On the back of its successful introduction, Autodesk increased the version number to AutoCAD Full Crack 2 in April 1983, followed by AutoCAD 3 in September 1984. Although in development for more than a decade, a version number increment from AutoCAD to AutoCAD 5 (now Autodesk AutoCAD) was not made until November 1997. The AutoCAD suite was finally introduced to the public on June 7, 1998, for the first time. It was certified by the U.S. Department of Defense (DoD) as a Mil-Spec quality

and U.S. Government Information Systems (USGI) classified standard. AutoCAD was the first commercially successful CAD program. Today, over 2 million AutoCAD users in more than 120 countries use the product. Design of the Program AutoCAD is a CAD application designed for the desktop. It has the ability to draw on the screen and to create 2-D and 3-D drawings. The user can view and edit the drawing in many different ways, and can print drawings on paper, a plotter or a wide variety of digital output devices. There are many different formats for working with AutoCAD drawings. The native format is DWG (DrafWorks Graphics), which is an industry standard for CAD. It is also possible to export AutoCAD drawings to the format of an intermediate CAD product such as Parasolid, and to export to Portable Document Format (PDF) and PostScript. The main window of the program is divided into several parts. These include the Settings Window, the Properties Window, the Viewer, the Layout

Window, the Insertion, Draw, Text and Dimension menus, the Home Tab, the Draw/Edit Toolbar, the Status Bar, the Rotate Window, the Viewer options, and the main menu. The Settings Window The first tab of the Settings Window is the Interface Settings. Here, you can change the behavior of many basic user interface elements, such as the command line. You can also change the colors that the user interface uses. The Color and Font Properties This section provides more details on how to edit the default settings of color and font. The Font Properties In the Font Properties window, you can edit the font for many different purposes, such as setting the font size. By default, AutoCAD uses a medium-sized Arial font, which has about 18 points.
