## Photoshop CS6: The Industry Standard Adobe Photoshop is based on the Windows platform, and Photoshop CS6 has been the industry standard for a long time. Here are a few of the major changes between CS5 and CS6: \* \*\*Metadata.\*\* This is information about your images that Photoshop automatically recognizes. If you decide that you want to edit a certain area more or less than another area, you can create a layer mask to create a more precise manipulation. \* \*\*Duplicate layers.\*\* This is a newer feature that allows you to create multiple versions of a layer in an image. You can move that layer around, edit it, even create layers of a different type and use those layers. Q: Formatting of the C# Part of a VB6/VBScript Program I have a legacy vbscript-to-vb6 program that's making it's way into vb6.0. I know it's hard to diagnose the issue given that it's so difficult to read, but I'm open to suggestions. The steps that I would need to fix would be compiling and running it, and then some scripting magic to read the output I'm trying to make this little guy finally run on Vista 32-bit (I have no idea why this worked for 32-bit, and not for 64-bit Vista, but it does and that's why I'm trying to fix the issue). When I try to run it, I get an error that says runtime error 429: object doesn't support this method or property. Here is the code: ('

### What's New In?

This post has been updated. As leaked photos show, the Boeing 737 Max 8 has become the latest victim of bad marketing. After growing alarmed at the way the Boeing 737 Max 8 was being marketed, a Californian-based airline issued a formal complaint Thursday after media outlets published purported images of the new aircraft. The Cessna Citation Bravo Skylane, a small single-engine jet that typically seats about 12 people, is more at home in the family range. It's newer and more cost-effective to operate. "We are extremely disappointed that Boeing would resort to such unfair and deceptive tactics to promote their new aircraft," California's Inter-American Low Cost Carriers Association, which represents the carrier, said in a statement. "Advertising of this nature provides a misleading view of the very reputable air carrier we represent." The carrier's complaint follows a series of media reports this week about purported images of the 737 Max 8, particularly that the model would be available in the configuration of a single-aisle, longer version of the 737. This follows the airline's statement a day earlier that it was "working closely with regulators and FAA" to understand the safety issues. The carrier wants to emphasize that it has "zero tolerance for any improper advertising of our airlines or aircraft." Boeing has been facing questions over the 737 Max 8 in particular since it was revealed that the crash of Ethiopian Airlines Flight 302 on Sunday had been caused by a new automated safety system. The crash killed all 157 people on board. Among the fatalities was a 6-year-old boy. The Federal Aviation Administration declared the Max 8 flight simulator accident a catastrophic accident, and is investigating the problem. Airlines are also seeking additional data on the plane's history, and the FAA is notifying carriers about the incident. Airlines often lean on the descriptive terms "narrow-body" or "short-body" to describe the 737 Max 8 and 737 Max 9. The 737 Max 8 will be available in a basic two-class configuration in "short-body" versions of both the 737-800 and 737-900ER variants, including for passenger service. "The new 737 MAX will continue to be a strong product for us," said Patrick Surry, chairman of AirTran
