If you are running a version of Minecraft older than 1.5 and want to change the player's permissions, then 1.6 introduces a new feature to help you with this. On 2.0 versions of the game and up, there is a new option called "Player permissions." It is a new tool that allows you to set up your minecraft server so you can see who you want to have permissions to do certain actions. On older versions of Minecraft, you will have to download a separate tool to change the

permissions. Normally in this case, changing the permissions will only give the owner of the minecraft server rights to add friends, while other players will not be allowed to add them. Changing the permissions can be accomplished with an old tool called "FGC." Ask a Q&A from our Mods community. Hope you enjoy it. Q: How do I get a specific texture pack installed? A: If you can see the texture pack you want to add in the texture pack window, then it should be installed. That will bring you to the Minecraft Forge website where you can find the tools you need to install the file server. When the installer pops up, click the button to install the Forge client.
