The victim alleged that his wife and him were about to be arrested and was feeling unhappy about it., “She was spreading stories against me through my parents,” he further added. Related Articles Welcoming the'merry' occasion, Eeranur Revathi, allrounder-cum-pacer off late, said, “The team’s journey so far has been good, and a defeat to an opponent like this one would only serve to raise the bar to the

next level. “I am confident that we have the right team in place to take us far, and I hope that we can erase the disappointment of yesterday. There is a lot at stake and we are keen to test ourselves against someone of their calibre. The five-wicket win over England in the ODI series on Wednesday should have been the start of a new start for Team India as much as a new captaincy has set the stage for a new beginning for MS Dhoni. Dhoni was named India’s 21st skipper after the end of the World Cup and

his record since then has been consistently poor. He's lost every game he's captained since his side was comprehensively thrashed by Australia in the Nidahas Trophy in Bangladesh last January. Not only has he not won any game, he's actually lost as many as he's won. Dhoni has played 19 ODIs before Sunday's game against South Africa. His record of six wins, nine losses and two no results means that he has lost 14 of his past 18 captaincy assignments. Dhoni is India's longest serving player and

captain, having led India since January 2006. He finished with a win in only four of his first 19 matches in charge, losing his last five. So far, India have won only one of their past six games of international cricket under Dhoni. A defeat in this game could mark the end of Dhoni's reign. India have beaten England in five out of their six meetings over the past four years, their only defeat coming in the ICC World Twenty20 in England last year. But then, the one thing that really stands in their way of success is the

lack of consistency in their batting. Dhoni has faced a setback. It's the highest since 2009 during the ODI series in India. India are looking for a meeting with their arch rivals Australia at e79caf774b

I'm looking to write something like this in VBA =if(B2=match(A2,Data!\$A\$2:\$A\$10))*CellRefill(C2,D2,E2) I'm not exactly clear on how to write that formula in a data row. I'm also not quite sure how to understand how to put the function CellRefill on the same row.

A: If you must use VBA then you need to make multiple passes. Use your cell reference with a nested function like:
=if(and(C2=match(A2,Data!\$A\$2:\$A\$10),B2=match(C2,Data!\$C\$2:\$C\$10))*CellRefill(C2,
