It's December of 2017. The NATO allies have just started to provide assistance to Ukraine, but President Poroshenko has yet to sign the non-aggression treaty with Russia. This is the scene of the battle for Kiev in mid-December. Russian soldiers from the 1st Brigade are spread out on the coastal axis. They control the important airport of Nikolayev on the coast, and are well-prepared for any new action. The US forces, on the other hand, are just starting to arrive and are not yet ready for battle. With three different scenarios, this Battle Pack provides players with a wealth of new missions for the US and Russian campaigns. Each scenario focuses on one specific region in Ukraine and can be played both as a campaign or as a standalone, quick-play battle. \*\*\* About the BROWSE mission pack\*\*\* If you are looking for a fast combat experience, then this Battle Pack for Combat Mission: World War II is ideal for you. This stand-alone expansion allows you to play one of three scenarios set in a very specific region of the Eastern Front of World War II. The missions are separated into three campaigns that can be played separately from each other. Different nations have different equipment but the same mission objectives. While the scenarios have a lot of detail, they can be played for head to head or in a quicker manner. The Battle Pack features three scenarios as standalone missions: - "Crete" As an Allied relief force, you have to break the siege of Crete, liberate the island and evacuate as much of your cargo as possible. - "East Forest" You need to clear the East Forest from the enemy advance, and secure valuable cargo caches. - "Wetland" As the naval invasion of the Delta begins, the US needs to get as many supplies to the fleet as possible. \*\*\* About Combat Mission\*\*\* The North Atlantic Treaty Organization (NATO) was formed on 4 May 1949 by the Founding Treaty. The Organization's original concept, as laid out in the Treaty, called for collective defense, collective mutual aid and collective security. However, the launching of NATO was a compromise forced by the refusal of the Soviet Union to participate in the new organization. The Soviet Union feared that NATO expansion into Eastern Europe threatened the security of its own borders. The fear of Soviet aggression and the substantial NATO reinforcements that were sent to West Germany during the Cold War led to Soviet fears of Western intentions that continue to this day.

Puppets Without Strings is an adventure for four 11th-level Starfinder RPG characters. It is the final encounter in the "Puppets Without Strings" Adventure Path and the sixth chapter in the second book of the Threefold Conspiracy. This adventure will conclude the Path and the three books it took place in. Starfinder Campaign Guide: This adventure was written with the official Starfinder RPG game rules (PDF download). - an enemy lair full of deadly traps and doubledeath probes - traps that work on PCs' will power rather than alignment - an infiltration that takes place on the home base of the conspirators In what is the first of two adventures dealing with the Threefold Conspiracy, Starfinder RPG player characters will infiltrate the home base of the puppet master himself to help unravel the plot. The Adventures of Alex Hamilton & Young Holmes An obscure dancer has been murdered. An assassin's plans have been thwarted by a mysterious stranger. And a young Sherlock and the Dread Pirate Roberts are on a desperate hunt to uncover the trail of a worldwide conspiracy. With his sidekick Alex, the duo tackle a case with nasty ties to an intergalactic organized crime empire. The adventures take place on the space station Absalom on the world of Jelouz. You will follow the murder mystery of the nonexistent Mme Poutain and her (fake) secretary Madeline. You will discover the twisted secret behind Madeline's dancing career on Venus, and work to avenge her murder on this planet. Finally, you will follow clues to an even darker space pirate. This module is a great way to introduce players to the game (or players to the game) if you are a beginner to Starfinder. The path of the conspiracy also is a great way to bring back characters from the previous campaign, in order to keep your campaign going. About This Game: The Adventures of Alex Hamilton & Young Holmes is a fantasy murder mystery roleplaying game. It is self-contained and can be played without any prior knowledge of Starfinder. The adventure is written by Benjamin Loomes and Chris and Glen Merriman. It contains three new monsters (including an intergalactic version of a Sunhawks), several new skills, and the first of two origin products. It is also the start of a new campaign, The Adventures of Alex Hamilton & Young Holmes: The Murder on Jelouz, that can be continued after the player c9d1549cdd

**Godus Wars is the newest installment in the world's most popular god game. The series is a fun and fast-paced real time strategy and god game. Control the Gods and mold an entire world into your own. The world is your canvas and you will determine what inhabitants your world will hold. Gameplay: At the core of the Godus Wars gameplay is the unique deformable terrain. Everything can be destroyed or formed. The shape of the land is ever-changing and offers infinite possibilities for your strategies. Discover the birth of a new people as they discover and settle on your land. Players will assume the role of the god commander who will lead their followers on their journey to greatness. As god commanders, they will shape the world around them and the path that their followers will take in order to create new lands, civilizations and untold history. Players will choose one of four Deities, each with their own play style, abilities and powers. Initially the player can view the land from up high in the sky or low to the ground. As the world is created and populated, players will have the option to go down and embark on the massive deformation process. Much of the game will take place under the earth and players will be able to move their units around as their world is deform. Players will have an evolving management system that provides them with the tools and resources needed to create a thriving civilization. As they control their cities and civilizations, players will be able to build, harvest, trade and explore all around their world. As their civilization gets bigger and stronger, players will**
