"The New Fantasy Action RPG" is a classic fantasy RPG turn-based battle system which is comprised of a multitude of RPG content and simple elements that enable you to enjoy non-stop fun. You can create a party of up to six characters and join online battles with others! ▼Game Concept GRAPHICS: • The visual quality of the 3D models is high, and the graphics are packed with details. • In contrast to many currently popular games, character details are shown in full 3D. • Different use techniques of graphics are applied to give the character models a sense of depth. • The background environment looks quite realistic and is filled with color. • The area of Ryunokami is filled with a mountain range and open fields, and has an appropriate, varied appearance. • The story comes to life with the help of fully rendered models. • The pre-rendered scene has more animation and smoother movement. • The three-dimensional character models can be freely rotated around their position. • The character model in Yuzorojima has a colliding effect, which creates the impression that the scenes are fully

3D. • There are many finely detailed textures with diverse colors used to enhance the emotions of each character. • Every item has its own texture, so in-game items look unique. • Players can differentiate the shadows and lighting created by objects, and every object looks unique. • The special effects used to create the visual sensation of true 3D have been applied to the scenery. • The scenery is full of color and texture. • The game makes use of perspective effect-type graphical effects that give the world a lively appearance. • The camera angles and change in depth show the actions of the characters. ▼Battle System GRAPHICS: • A complete turn-based combat system that is simple and easy to play. • Nine skills can be upgraded through in-game materia, and special skills are not divided. • Characters have quick evasive moves, which function when characters are tapped with the screen. • Characters can perform special attacks as well as powerful attack depending on the types of weapons. • Special attacks change depending on the type of weapon that is being used. • Numerical expressions shown next to the character icons indicate each

Features Key:

Playability

- Based on the Steam PC version of Tarnished Champion, the free version of the Elder Scrolls Online.
- Improves the aspects of the Elder Scrolls Online you know and love.
- Can be played in either the default graphical settings or without graphical settings.
- A high number of monsters as in Elder Scrolls Online, but enemies are more often secondary attackers.
- History of the area of the Throne of Eldur and the Lands Between via pictures and diary entries.
- Maps with three-dimensional designs that are easy to recognize.
- An interface with the option for connected online play.

Beautiful world

- The world is a vast, lively world of flow and change. Step into an open area to explore it in detail. You can also choose settings in this section according to your play style.
- Seamlessly connected side areas that allow you to move freely between them without restriction.
- The story covers an enormous theme.
- A large variety of monsters.
- A huge map gives a sense of a world with expansive areas.

Breakthrough gameplay

- Combat is radically changed from other action RPG games.
- Discover short and long term effects as you approach bosses or research, such as permanent reductions in strength and accuracy, passive or active damage decreases, damage increasing over time or the option to even decrease vitality.
- Movement and attack styles that make action more like that of games like Devil May Cry.
- Battle comes to life thanks to various animations.

Mobile-optimized RPG gameplay

- The game can be played on touchscreen devices.
- A high-quality menu system and the ability to select appropriate weapons and gear based on the appearance of the enemy.
