I want to retrieve the users who have the record which is having the feild called "Country" on the first place. Here is the query that i'm using. Select users.*,countries.Name as CountryName from users join countries on users.id=countries.UserId I'm getting the output as 3. But i want the output as 1. A: select users.id, count(*) from users left join countries on users.id = countries.UserId group by users.id order by users.id Check out our blog for the latest from our team Thinking about sharing a business between two or more people? Think again! It can be tricky when you are thinking about co-ownership of a business, and particularly in case you do not have
